

# Bill Acceptor

- Ardac Elite with high capacity cash boxes

The CB1000 from Money Controls combines reliability, security and performance. As well as a high capacity non-stacked cashbox the CB1000 comes with all the benefits associated with Money Controls' Ardac Elite.

# Bill Acceptor

## Key Features

- High capacity
- Built-in drive mechanism
- Cashbox full sensor
- Extensions available
- Robust steel construction
- Cashbox fitted switches and signalling as standard
- Anti-tamper features
- Cashbox handle
- Range of illuminated bezels available
- Range of industry standard protocols available
- Compatible with world currencies
- Accepts 64 bills x 4 ways, 256 faces

## High Capacity

The CB1000 has a much larger capacity than a traditional 'drop box' and can hold up to 1,000 bills as standard. The bills are driven into the cashbox using a drive mechanism built into the box itself. Cashbox capacity can be increased up to 7,000 bills or more using extensions to the cashbox, each holding up to an additional 1,000 bills. As with all Money Controls' products, the CB1000 offers excellent value for money.

## Robust Construction

The CB1000's robust steel construction means it easily meets the demanding needs of the ticketing and kiosk markets. The cashbox handle allows easy insertion, removal and transportation of the CB1000 and it makes use of the proven technology used by the Ardac Elite.

## Security

At Money Controls we know how important security is to our customers. The CB1000 is just the latest Money Controls' product to offer excellent resistance to fraud and tampering, including the ability to fit 'tamper evident' tags to the cashbox. The CB1000 can be locked into the steel chassis using industry standard locks.

## Technical Data: CB1000

### GENERAL

Dimensions: (mm)(W x D x H)	140 x 248.5 x 344.5 (with standard cashbox and no bezel)

Capacity:	Standard cashbox up to 1,000 notes *1 With one extension up to 2,000 notes *1 Additional extensions can be specified

\*1 Bill capacity will vary depending on bill size and bill quality

## Ardac Elite

The Ardac Elite's state of the art imaging technology increases acceptance rates and user satisfaction. A range of industry standard interface protocols are available including ccTalk and ID003, as well as a range of illuminated bezels. An API allows the easy integration of the Ardac Elite into PC based systems. The Ardac Elite can be easily updated for new bank bills or currencies either remotely or using the simple handheld Ardac EP USB device. While traditional acceptors sample only part of a bill, the field proven Ardac Elite takes an image of the whole bill. The last bill image display function can also be used to easily resolve disputes (patent pending).

## Custom Solutions

At Money Controls, our products and product integration solutions are competitive with the very best. We recognise that it is impossible to produce one solution that fits everyone's needs, so we provide the flexibility to deliver custom solutions for your specific needs. Please contact us today to find out how we can help you.
